

ADR

WHO IT MAY CONCERN:

The ADR agreement is mandatory for all tank vehicles transporting dangerous goods in accordance with the European ADR Agreement 2023 and is addressed to both tank truck manufacturers and to their users.

What is ADR

The ADR Agreement constitutes the "European Agreement for the Safety in the International Road Transport of Dangerous Goods".

It is the acronym (Accord European relative au transport international des marchandises Dangereuses par Route) of the European Agreement on the International Carriage of Dangerous Goods by Road. According to Article 2 of the said Agreement, the road transport of dangerous goods is permitted as long as it is subject to compliance with the provisions of its technical annexes. The annexes of ADR include provisions that, among other things, concern the classification of goods, shipping procedures, requirements for the construction and control of packages, tanks, etc., conditions of transport, loading, unloading, management, requirements for crews and the vehicle.

The Agreement refers to the safe transportation of dangerous goods, like explosives, liquefied gases (for example propane, butane, etc.), flammable liquids (for example petrol, diesel oil, etc.), acids etc. and to the special requirements which have to fulfill the vehicles and their drivers.

WHAT ARE THE DANGEROUS GOODS ACCORDING TO ADR

The classes of dangerous goods according to ADR are:

Class 1.0: Explosive substances and articles

Class 2.0: Gases

Class 3.0: Flammable liquids

Class 4.1: Flammable solids, self-reactive substances and solid desensitized explosives

Class 4.2: Substances with the possibility of spontaneous combustion

Class 4.3: Substances that emit flammable gases in contact with water

Class 5.1: Oxidizing substances

Class 5.2: Organic peroxides

- Class 6.1: Toxic substances
- Class 6.2: Contaminants
- Class 7.0: Radioactive materials
- Class 8.0: Corrosive substances
- Class 9.0: Miscellaneous dangerous substances and articles

The Goals and Benefits

- Complying with ADR regulation
- Road transport safety and operator protection. Ensuring the reliability of transporter
- Compliance of tankers with substantial safety requirements depending on the dangerous goods carried.

Why with EUROCERT SA:

Independence: EUROCERT is a Greek Independent Certification Body, with highly trained scientific inspectors and experienced in the field they operate, founded by scientists with many years of experience in audits and inspections, with offices in 50 countries in Europe and Asia.

Validity: EUROCERT is an Accredited Inspection Body by the Greek Accreditation Council (ESYD) in the field of ADR, with accreditation certificate nr 53.

Experience: More than 18 years of experience in the certification of ADR vehicles.
