REFUEL EU AVIATION VERIFICATION SERVICES

Regulation (EU) 2023/2405 | SAF Uplift | Economic Tankering | Fuel Reporting Compliance

Sustainability in aviation.

Airlines and aircraft operators departing from Union airports must comply with the RefuelEU Aviation Regulation (EU) 2023/2405, requiring accurate reporting of aviation fuel uplift, SAF usage, and economic tankering practices. Regulatory bodies and stakeholders demand transparent, verified data on fuel consumption and sustainability efforts. Verification ensures the accuracy, completeness, and reliability of the information provided, building trust, ensuring compliance, and demonstrating commitment to sustainable aviation.

As an independent accredited certification body, we offer Verification for RefuelEU Aviation reporting obligations in line with:

- ✈️ Regulation (EU) 2023/2405 – RefuelEU Aviation
- ✈️ EASA Digital Reporting Requirements
- ✈️ Sustainable Aviation Fuel (SAF) Traceability and Certification
- ✈️ Economic Tankering Practices Review and Validation

Our accredited verification services ensure your organization's fuel data and reporting processes meet the highest standards, build stakeholder confidence, and demonstrate commitment to sustainability and regulatory compliance.

WHAT IS REFUEL EU AVIATION VERIFICATION?

RefuelEU Aviation requires aircraft operators to report:

- ❖ The total aviation fuel uplifted at Union airports, including the volume of SAF used.
- ❖ The origin, feedstock, conversion process, and greenhouse gas (GHG) emission factors of SAF.
- ❖ The total number of flights departing from Union airports and flight hours.
- ❖ The economic tankering strategies implemented.

Verification is an independent evaluation of your organization's reporting to ensure it is:

- ✅ Accurate
- ✅ Complete
- ✅ Transparent
- ✅ Aligned with Regulation (EU) 2023/2405 and EASA requirements.

Our services follow recognized verification standards such as ISO 17029, ISO 14065, and EASA guidelines, adding credibility to your reporting and ensuring compliance with European sustainability mandates.

TO WHOM IT IS ADDRESSED

Our RefuelEU Aviation Verification services are addressed to:

✈️ Aircraft operators required to report under RefuelEU Aviation Regulation (EU) 2023/2405.
✈️ Airlines implementing Sustainable Aviation Fuel (SAF) usage and tankering strategies.
✈️ Operators needing independent verification of their fuel reporting data for regulatory and stakeholder purposes**.**

BENEFITS OF VERIFICATION

By choosing our independent Verification services, you can:

- ❖ Demonstrate compliance with RefuelEU Aviation Regulation (EU) 2023/2405.
- ❖ Increase the credibility and transparency of your SAF and aviation fuel reporting.
- ❖ Reassure regulators and stakeholders of the accuracy of reported data.
- ❖ Facilitate access to regulatory benefits, incentives, and funding tied to SAF use and carbon reduction commitments.
- ❖ Strengthen your sustainability profile in the aviation sector.

CERTIFICATION WITH EUROCERT

EUROCERT is the largest Greek independent certification body, accredited by ESYD, with a presence in more than 40 countries worldwide. Certification with EUROCERT means you receive evaluation from a recognized, accredited, and experienced body in sustainability and regulatory compliance in the aviation sector, including EU-ETS and CORSIA.

Our RefuelEU verification services offer:

✔ Expert assurance teams with aviation and sustainability specialists.
✔ Tailored verification solutions for different operator sizes, operations, and fuel reporting complexity.
✔ Continuous updates on changes in RefuelEU Aviation and EASA reporting obligations.
✔ Global recognition thanks to our extensive accreditation and international presence.

Our approach is objective**,** transparent**,** and aligned with the latest European and international standards**.**
